## Manager's Report by Rob Clarkson

Our lake is at draw down pool only until Dec 10<sup>th</sup>. At that time we will leave the Morning Glory closed and Mother Nature will decide how quick we get to full pool again. Just a reminder that Wake is only allowed after we have reached above the 16" below full pool mark. There may be a short window of opportunity to complete your lake front projects so don't get caught behind the curve. Rip Rap and Soil cloth will be available for purchase from the Association as always.

We have experienced yet more off-roading on the North Property. Please exercise common sense during wet weather conditions and refrain from taking vehicles off the roadway. Deliberate damage will be investigated and charges filed.

We are continuing our collection efforts. Members who may have difficulty staying current with this requirement should contact the office and communicate with us any special needs. Dues and Assessments come due January 1st.

2020 is almost behind us and we have made great strides as an association to curtail costs, repair our roads, and sustain the natural beauty of our community. In 2021 we will continue these efforts and do all we can to make our community a safer place for all who live here. We face many challenges with respect to boating, slow moving vehicles, code enforcement etc. Please go online or stop by the Office and familiarize yourself with the current Rules, By-Laws, and Covenants. Please be patient and understand that Public Safety officers are just performing their job duties.

Boat and Slow moving vehicle stickers expire April 30<sup>th</sup> and are available after Dues and Assessments are paid in full. Pay your Dues and Assessments by Feb 14<sup>th</sup> in full and you will be entered in the drawing for this years assessments refund. One winner will receive \$660.00 assessment back to be drawn at Board of Directors meeting February 24<sup>th</sup>, 2021.

Volunteers are needed for the  
Holishor Association Nominating  
Committee & the Social Committee.  
Contact the office for more information.

## Christmas Tree Drop Off

*Christmas Trees can be dropped off at the  
maintenance shed on St. James Drive.*

*Look for the sign stating  
where they should be left.*

*Holishor will chip them for mulch.*

*Please remove all ornaments, tinsel & lights.*

**DO NOT PUT YOUR TREES IN THE LAKE!!**

# Safety first: Tips for pet-proofing your home

(BPT) - Welcoming a four-legged friend into your family is an exciting time for everyone, but puppies, kittens, dogs and cats can easily find themselves in serious trouble while exploring their new surroundings. It is important to remember that pets are naturally curious and explore their worlds with their mouths, so they will want to interact with or consume anything left out at their level. Because of this, your home is filled with potential risks, some obvious and others you might not expect. The good news is there are simple steps you can take to help keep your new pet safe.

Purina behavior scientist Dr. Ragen T.S. McGowan offers these timely tips to help pet-proof your home and give you peace of mind that it is a safe place for your dog or cat to live and thrive.

## How to Keep Your New Pet Safe

### 1. Put away the toxins

Many common household items are toxic for pets. Cleaning supplies, detergent, bleach, fertilizer, pest or rodent bait traps and paint can all cause serious harm if ingested. McGowan says, "Make sure to always store toxic items in a place where your pet cannot access them, either in a locked cabinet or on high shelves out of their reach. Even if you are vigilant about keeping these items out of reach, sometimes accidents happen. It is good to have the number for the Animal Poison Control Center handy or even saved in your phone, just in case: (888) 426-4435."

### 2. Secure small hardware

Pets are attracted to small items that they can mouth, chew or bat around in play. In the home, small hardware items - from buttons, pins, batteries and magnets, to nails, staples, tacks and paper clips - may look appealing to pets, but could cause serious cuts or even damage internal organs if swallowed. "Before your new friend comes home, do a sweep to ensure small hardware items, batteries and magnets are securely stored or kept out of reach," shares McGowan. "This means getting down to their level and retrieving any items that may have fallen under or behind the furniture. Tacks, pins and magnets should also be moved up from low hanging bulletin boards or the front of the refrigerator, where they could attract the attention of cats, especially."

### 3. Beware of food bags ... and practice proper food storage

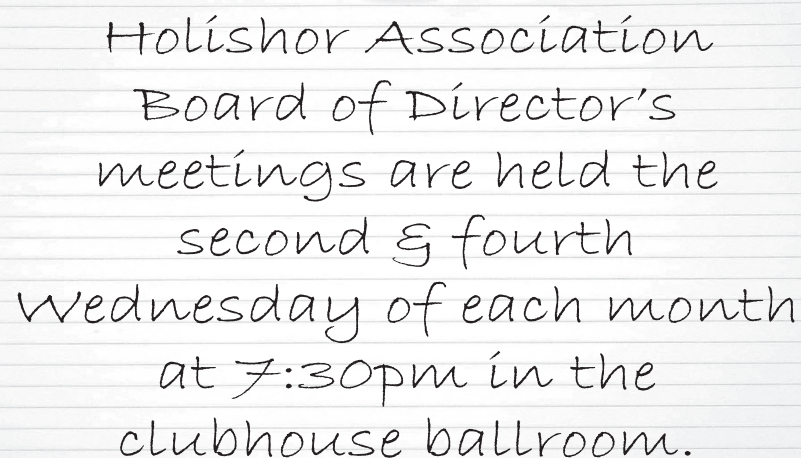

Almost every one of us is guilty of leaving a bag of chips or box of cereal open on the couch or kitchen table. This may seem harmless, but many food bags, including for pet food, are made from a strong material that helps keep food fresh. A curious pet can get stuck if it goes looking in the bag for leftover crumbs or an early dinner.

"Food packaging can be quite attractive to pets. Not only does it smell like food, but it makes a crinkling noise that pets associate with food, treats or play," shares McGowan. "Make sure to store food or treat bags up high out of your pet's reach, or inside cabinets or closets. We also recommend

rolling the pet food bag closed and storing the entire item in a resealable hard container, so you can keep the label information handy," advises McGowan. "A pet of any age, size or strength can quickly find themselves in a troubling, and potentially heartbreaking, situation when left unattended with a food bag. By using resealable containers, you limit the risk - and, as a bonus, your food will remain fresh." Similarly, remember to cut empty bags along the entire top, bottom and down at least one side before disposal, in case your curious pet rummages through the trash.

### 4. Conceal electronics

Electronics are ubiquitous in most homes, but the many wires and cords they come with can look like a fun toy to your pet. To keep your pet from chewing them or getting tangled, bundle loose cords behind furniture and store extra chargers and cables in a place that cannot be reached or opened with a paw or nose. For cords that must remain visible, McGowan suggests camouflaging them with cable-coverings or tape, so they are less attractive to your pet. "It is also a good practice to store remote controls and video game controllers in a bin or a drawer where your pet does not have access to them," she adds. "These items often smell like food or lotions from our fingers which can attract pets to chew on them, but their electrical components and batteries are harmful if consumed."

Holishor Association  
Board of Director's  
meetings are held the  
second & fourth  
Wednesday of each month  
at 7:30pm in the  
clubhouse ballroom.

All Holishor members are welcome to attend.  
If you cannot attend you may submit a written correspondence to go to the Board. It must be received in the Holishor office seven (7) days prior to the Board meeting. This allows the Board time to research the issue before the meeting.

### 5. Keep dangerous ingredients out of reach

In the midst of the COVID-19 pandemic, many people are making more meals at home, including experimenting with new recipes. It's important to remember that some common ingredients can be harmful to your pets. "Before you make your grocery list, review recipes against a list of ingredients that could be toxic for dogs and cats," counsels McGowan. "Chocolate is well known, but you'll also want to avoid grapes, raisins and certain

spices. Xylitol, a sugar alternative found in everything from cake mixes to yogurt, peanut butter and chewing gum, is another toxic ingredient." Best practice is to keep all food and ingredients stored in cupboards, pantries, drawers or on high shelves out of reach of your pet.

We all want to make the most of life with our new furry companions, and by following the above tips, we can do so safely. We also encourage you to have your veterinarian's contact information easily accessible, so you are ready in case of trouble.

As you prepare to start life with your new pet on the right paw, you can read more tips from McGowan and other Purina experts at [www.purina.com/articles](http://www.purina.com/articles).

KARATE CLASSES  
in the clubhouse ballroom  
TUESDAYS / THURSDAYS

**Motion Carries**

**Profit & Loss**

Submitted for review.

**Manager's Report**

Read by Rob Clarkson

**Public Safety Report**

Read by Rob Clarkson

**Old Business**

**Traffic Signs**

**Jerry Allen** After the last meeting Brian and I got together and discussed the map and the locations that we had noted as potentially putting stop signs or yield signs. We've since got together and came up with a list of the different streets and intersections where a stop sign would be recommended. We took all the yield signs off, because we felt like a stop sign would be better use of our money and basically help us control the speed, and also make it clear who has the right of way. So the list that Brian and I prepared to provide to you guys is a list of them. There's 33 total, and on the list in blue means we're going from a yield sign to a stop sign. The highlighted in black means there's already a stop sign there so those we don't have to do anything with. And all the other ones are the ones that would need a stop sign. They are listed by a red "S", I'll use the top one Jamaica and Caribbean. That means that on Jamaica is where the stop sign would go at that intersection, because of the flow of traffic. So what it came up to, we had 33 signs that would be needed in this northwest segment of our community that we were looking at specifically, the cost per sign, I think we came up with \$50. So the total cost if we were to put a sign up in each one of these locations would be \$1650. So I know, we just gave you this list tonight so if we want to take it and look at it, review it and drive by these locations ourselves, and come back to the next meeting and make a decision about where we want to put these signs, we could do that as well. **Anthony Harrell** Wouldn't it actually be 42 signs

according to what you have here. We have 33 stop signs to be added and nine yield signs removed and stop signs added. **Jerry Allen** No, those nine yield signs we'd be removing them and have stop signs there instead. **Anthony Harrell** Right? So you have to buy those stop signs. **Jerry Allen** Okay, good point. That's right. I didn't include that here. Right. **Brian Wood** So the \$50 cost, is that covering a post and a sign? **Jerry Allen** Yeah, I believe those were the numbers we got for a metal post and a sign. **Brian Wood** So then this cost is gonna be just a little less on those that have an existing post that we're just changing the sides out for those nine. **Jerry Allen** So that's a lot of stop signs. A lot of signage we currently don't have and many of our community are not used to stopping at these intersections. But many of these intersections especially Tartuga and Barbados stands out in my mind because there's zero signs and it's a four-way intersection. And like I've said before, I've almost got t-boned there once. I came upon an accident about five or six years ago that somebody got t-boned there and I've just seen a lot of people come off Tartuga and turn on Barbados and not stop. So some of those intersections that are much more traveled on are the ones that I think we need to address pretty immediately, or as soon as possible. **John Crotty** At one point you guys proposed putting one on Caribbean to break it up. I don't see that on the list. **Jerry Allen** I didn't include that on the list. That was something I thought we could just chat about and see what we all thought about having something on that street. It's a pretty long street and people do get up to speed pretty quickly and exceed the speed limit quite often. The sheriff was there a couple days ago, do we know how many people he stopped? **Matt Ressler** No I don't know, but I could easily find out. **Anthony Harrell** Any other thoughts on the overall presentation here? **Brian Wood** I agree with Jerry on that. Getting rid of the yield signs and putting in more stop signs. I know people may not like it at first, but it's going to make it safer out there, especially since the inclusion of the golf carts and the side by sides which are less visible on the roadways. And I just think the more stop signs we put in there it's gonna delay people for an extra 10 seconds in their drive. I don't think that's too much to ask to have a safer community. **Matt Ressler** I like the approach, proactive instead of reactive when something happens. **Tony Harris** I think just for the discussions we've had before, you know we don't have a lot of accidents out here. I'm not sure you know, we have people that do speed and obviously we have the sheriff's department come out and try to rectify that and get people to slow down. You know, we give them tickets and whatever. I'm not sure if we need this many stop signs. We should go ahead and look over it and have more discussion on it the next time. **Anthony Harrell** All right, so everybody will take this home, drive the community and see what you all think and then we'll come up with a decision at the next meeting.

**Marina Cable Rule/Fines**

**Anthony Harrell** Rob, we talked about this the last meeting, we have the verbiage written up with one of the things that's kind of holding us up is do we have some way other than security being there and witnessing it. Do we have any progress with the camera? **Rob Clarkson** I was told

that there’s going to be a very detailed surveillance system put in down at the marina and that we would have access to it. **Tony Harris** Do you have any ideas on a time frame of when they might have that in **Rob Clarkson** I assumed that it was gonna be like towards the spring because it has to do with people messing with people’s boats and his business. **Anthony Harrell** So one of those cameras may be overlooking the cable. How would we monitor it? Is he going to do it for us? **Rob Clarkson** The discussion I had with him was I just get together with him and go view it. **Brian Wood** Do you know if it’s gonna be something you can do remotely, that anybody can see remotely? **Rob Clarkson** I would doubt it. I mean, it’s gonna be a private system. So I don’t think he’s gonna allow us access to that. **Brian Wood** We did talk briefly at the last meeting, too, about putting a new lock on it. **Rob Clarkson** We’re actually getting the padlock that you and I talked about. You have to lock it to get the key out. It’s on order. **Anthony Harrell** With that piece of information, we may have surveillance on that cable. Is this something that we think we might want to move forward with? **Matt Ressler** I think so. **Tony Harris** Do we want to table the rule until the spring to see what we’re going to have? We could have the rule in place, we’re gonna put it in, we would have it but we may not be able to enforce it depending on what we get from the cameras. If it’s not what we need, we won’t be able to enforce it unless security sees it. **Anthony Harrell** When Rob installs that new lock, where you can’t take your key out unless it’s locked back up, that may eliminate the whole issue, right? **Rob Clarkson** They could still leave the cable down and lock it and get the key back. **Brian Wood** It should help with the people forgetting because a lot of it I think is just honest mistakes and people forgetting to lock it back. And I think that’s going to help with that issue. It’s not going to solve the problem, but it might help. **Matt Ressler** What are you gonna do when you have people start coming up, because if somebody’s got a key in there, I’m gonna take it out. **Rob Clarkson** You have to lock it in order to take the key out. **Matt Ressler** Right. So I’m going to take their key out and turn it into the office. So I mean, what are you gonna do whenever you start getting people coming in here saying, Oh, I forgot my key and somebody took my key. They’re gonna pay for a new one. **Brian Wood** Yeah. If that’s your fine structure then obviously they didn’t lock it when they were done. **Matt Ressler** Right. So do you write a citation off of that? **Brian Wood** Absolutely. **Matt Ressler** I think you would. **Anthony Harrell** So I think we should wait and see how that all pans out and what kind of an issue is after we have the new lock. I don’t see where it’s gonna be a huge problem after that. **Matt Ressler** What if it is? Then you got to wait an extra 90 days for it to go into place. So my recommendation would be go ahead and put it in place now. That way you always have it there. **Anthony Harrell** Have we posted the rule somewhere? **Tony Harris** No, we haven’t. We have to make a motion and a second and post it. And then we wait the 60 days and then approve it. **Matt Ressler** Well, I’ll make a motion. **Tony Harris** But we want to see if we have the cameras because we have basically no way to enforce it. **Matt Ressler** I’ll make a motion to post that rule as written. **Rob Clarkson** You need to read the rule. **Jerry Allen** Let’s take another look at it. It’s been a while since we looked at it, at least since I’ve looked at it. **Matt Ressler** Well, then I say we keep this on the agenda for the next meeting then. **John Crotty** With not having as many meetings at the end of the year, there’s not going to be many opportunity for people to come up talk about it. Right. There’s nobody getting on and off the lake much right now anyway. **Anthony**

Fill in the blank squares in the grid, making sure that every row, column and 3-by-3 box includes all digits 1 through 9.

**Harrell** Can we get that verbiage in the next packet.

**Fish Stocking**  
**Rob Clarkson** They were 500 short on bass, and they called me the other day and wanted to deliver some really little ones. I told them no, we would hold off till the spring, and put the ones that we bought in. There’s a national shortage, they sent me an email today just to confirm that they owe us 500. I didn’t want two to three-inch bass being put in and being eaten. **Anthony Harrell** How many people witnessed the fish stocking? **Matt Ressler** Shaun Diltz was there and was Rob Frey there? **Rob Clarkson** Yes and a couple of the maintenance guys. Mortality rate was

# How to Make Remote-Learning More Rewarding and Fun

(StatePoint) In the remote-learning environment of the 2020-21 academic year, certain types of classes have been deprioritized and the school day has lost some of the structure and sociability that in-person learning affords.

In the face of these challenges, how can you make remote-learning more rewarding and fun for your child? Consider the following tips and ideas:

- **Encourage video study sessions:** Socializing is an invaluable aspect of a traditional school day. Unfortunately, remote-learning can be a lot more isolating. Have your child invite classmates to form a remote study group. Doing so will help reinforce lessons, make learning the material more interactive and provide a much-needed opportunity for students to socialize.
- **Reincorporate music education:** Have music classes been canceled this year? Your child can still reap the benefits of a music education by playing an instrument like a Casiotone Keyboard. The Casiotone series of keyboards are great for beginners. Not only do they have a built-in learning system, they have a 3/4 jack for headphones so the rest of the house doesn't have to be distracted during practice sessions. Learning to play a keyboard is not only fun, it can help with science, math and cognitive learning. Studies have shown that children and adults with musical training have heightened skills in an area called executive functioning.
- **Schedule midday movement:** Physical education may no longer be part of your child's curriculum, but you can still make time for movement. Schedule a screen-free block of time each day to replace gym class or recess. Encourage kids to move around and if possible, get some fresh air. They'll return to their next class refreshed and focused.
- **Master math at home:** Math can be an especially tricky subject to master remotely. But new tools can help students grasp complex concepts. For example, ClassPad.net is a tool geared toward K-12 and beyond that exceeds the functionality of a calculator. Among its many features are a virtual protractor and compass, and a math-based text editor that provides a rich assortment of mathematical templates. This web-based calculator also gives users the ability to create folders, organize and share work. These tools are free to educators and students and can eliminate the need for an expensive graphing calculator. To register or learn more, visit ClassPad.net.
- **Create digital masterpieces:** Art is still an important subject for kids, even if it isn't being offered this year. However, you don't need to install

Photo Courtesy of Deb Sierchio

a full-fledged art studio in your home for kids to be able to create artwork in a range of mediums. Digital apps mimic the act of drawing, painting, illustration, collage and more, helping to build a foundation of skills and lay the groundwork for further exploration.

While some of the challenges of remote-learning are inevitable, there are many ways families can make the experience more positive for students.

# Can You Recognize Signs of Stroke?

(StatePoint) Many people are avoiding in-person doctor's visits to limit potential exposure to coronavirus -- or are simply ignoring health concerns altogether. However, when it comes to medical emergencies such as stroke, immediate medical attention is critical.

The fifth leading cause of death in the U.S., stroke occurs every 40 seconds and it can happen to anyone, of any age, at any time.

Experts say that immediate medical attention, which is vital, relies on everyone learning and being able to recognize the BE FAST signs and symptoms of a stroke in themselves and others and calling 911 immediately. BE FAST stands for Balance, Eyes, Face, Arm, Speech, Time and refers to these signs of stroke:

- **Balance:** Sudden loss of balance
- **Eyes:** Loss of vision in one or both eyes

- **Face:** Face looks uneven or droopy
- **Arm:** Arm or leg is weak or hanging down
- **Speech:** Slurred speech, trouble speaking or seems confused
- **Time:** Immediately call 911

For more shareable information and resources, visit [Strokeawareness.com](http://Strokeawareness.com), developed by Genentech Inc, a member of the Roche Group. BE FAST™ was developed by Intermountain Healthcare, as an adaptation of the FAST model implemented by the American Stroke Association. Reproduced with permission from Intermountain Healthcare. © 2011 Intermountain Healthcare. All rights reserved.

 **Balance**  
Sudden loss of balance

 **Eyes**  
Loss of vision in one or both eyes

 **Face**  
Face looks uneven or droopy

 **Arm**  
Arm or leg is weak or hanging down

 **Speech**  
Slurred speech, trouble speaking, seems confused

 **Time**  
Immediately call 911

If you, a loved one or friend are experiencing any of these symptoms, call 911 immediately. When it comes to stroke, time matters.

# Holiday Shores Snow & Ice Removal

Snow plowing and ice control begins when there is two inches of snow and more is expected or when ice begins to make the roads hazardous. Ice control material is applied to location on an "as needed" basis.

It takes 4-5 hours to plow the entire community with only two inches of snow.

Please drive with caution anytime winter precipitation is on the roads.

**DO NOT CALL THE OFFICE TO SEE IF THE SNOW PLOWS ARE OUT OR TO REPORT SNOW. PLEASE BE PATIENT.**

## ***Which roads are plowed first?***

Heavy traffic hills and main roads are plowed first.

### **HILLS**

**GATE J - BOULEVARD DE CANNES & ST. JAMES**

BOULEVARD DE CANNES & ELM

**GATE M - HOLIDAY POINT PARKWAY & ST. JAMES**

INTERSECTION AT HOLIDAY POINT PARKWAY & BARBADOS

INTERSECTION OF CATALINA & HOLIDAY POINT PARKWAY

**GATE N - RENO COURT**

**GATE O CARRIBEAN**

THE HILL BEFORE CARRIBEAN & BISCAY

THE HILL ON FOUNTAINBLEU EAST OF CAPTAINS

THE CURVE ON FOUNTAINBLEU JUST BEFORE GATE G

THE HILL AT THE INTERSECTION OF ANCHOR & BRIGANTINE

THE HILL ON SEXTANT BETWEEN PORT LANE & COMMODORE

### **PRIORITY 1 ROADS**

CEDAR LANE, SHORE DR, HOLIDAY DR, ELM, BOULEVARD DE CANNES, NEWPORT BAY, HOLIDAY POINT PARKWAY, CARRIBEAN, BISCAY, WAIKIKI, CASTLE, HIGH POINT, SU TWAN, FOUNTAINBLEU, TREASURE, TAMARACH, OVERLOOK & BIRCH

## ***What caution should I be aware of?***

Do not park on the road during the snow removal process. Do not push snow on to the roadway, this creates a very hazardous condition.

## ***What about driveways?***

Maintenance personnel are not authorized to plow driveways & plows will not be lifted at the entrance to each individual driveway.

Clearance of driveway entrances is the responsibility of the resident. Plows may make several passes in order to widen the roads.

## ***What about mailboxes?***

The truck will get as close to the mailboxes as possible. It is the homeowner's responsibility to keep the area in front of the mailbox cleared.

Keep mailboxes closed at all times.

## ***What about trashcans on pick up days?***

Trashcans & recycle containers must be 4' off the road.

The snowplow drivers will not get out to move your containers and will not be responsible for damage.

## **USE CAUTION!!**

**When maintenance is out on the roads, stay a safe distance behind the trucks.**

**If you cannot see the mirrors on the trucks, they will not be able to see you.**

**PLEASE BE PATIENT AND COURTEOUS**

# Winter wellness: 3 expert tips to boost overall health

(BPT) - As we head into the chillier months, the winter season brings simple pleasures such as hot cocoa, holiday music and cozy nights by the fireplace. However, the hustle and bustle of the season can also take a toll on your well-being. Stress and unhealthy eating associated with seasonal celebrations are paired with colder weather that makes many people want to curl up inside with a blanket. Plus, the ongoing challenges of virtual learning, remote working and staying home can also impact overall health.

Fortunately, Registered Dietitian and Nutritionist Dawn Jackson Blatner has three simple tips to boost your overall health and immunity this winter:

## Get active daily

With so many people working and studying remotely, physical activity is already lower. With the addition of colder weather, people of all ages may not be getting enough exercise. It's important to make time to be active at a moderate

level for 20-30 minutes a day. You can stay safe working out at home by following free online workout videos, practicing stretching and yoga independently, playing actively with your kids, or doing another activity that gets you up and moving. Whatever you like, just make sure to carve out time daily to be active to ensure the most benefits.

## Soak up the sun whenever possible

Fresh air and being outside is great for supporting mental health, but it has physical benefits as well. Being outside for 10-15 minutes each day helps your body absorb adequate vitamin D from the sun. So even if the weather is chilly, it's worth putting on a few layers and going outside on your patio or taking a walk around the block. You'll be amazed how refreshed you feel! Remember, if you're going to be outside longer than 15 minutes, you'll want to wear sunscreen because even during cool or cloudy days, sunburn is a possibility.

## Choose nutrient-dense foods

Ensuring you get plenty of vitamins is important, especially during winter months, to support health and wellness. One simple swap you can make is adding nutritious Eggland's Best eggs to your diet. Compared to ordinary eggs, Eggland's Best eggs are richer in a variety of micronutrients including six times more vitamin D, 10 times more vitamin E, and more than double the vitamin B12 and omega-3s. These micronutrients can only be derived through the foods we eat and can help support a strong immune system throughout the winter. To add even more nutrition, pair your eggs with plenty of colorful vegetables like spinach, tomatoes, bell peppers and more.

**If you're looking for a nutritious and delicious brunch recipe this winter season, try the Asian Frittata from Eggland's Best:**

## Asian Frittata

### Ingredients

#### Sauce

1 tablespoon white vinegar  
1 tablespoon soy sauce  
1 teaspoon hoisin sauce  
1/2 teaspoon freshly grated ginger root  
1/4 teaspoon finely chopped fresh garlic

#### Frittata

6 ounces boneless skinless chicken breasts, cut into 1/4-inch strips  
1 teaspoon soy sauce  
2 teaspoons sesame oil  
6 Eggland's Best Eggs (large)  
1/2 teaspoon pepper  
1/4 teaspoon salt  
3 tablespoons Land O Lakes® Butter  
1/2 cup chopped red bell pepper  
4 (1/2 cup) green onions, thinly sliced  
1 small stalk (1 cup) bok choy, cut into 1/2-inch pieces

#### Directions

Heat oven to 350 F. Place oven rack in upper middle position.

Combine all sauce ingredients in bowl; set aside.

Combine chicken, 1 teaspoon soy sauce and 1 teaspoon sesame oil in bowl; set aside.

Combine remaining 1 teaspoon sesame oil, eggs, pepper and salt in bowl; beat with whisk. Set aside.

Melt 1 tablespoon butter in 10-inch nonstick ovenproof skillet over medium-high heat until sizzling; add chicken strips.

Cook, stirring occasionally, 2-3 minutes or until chicken is no longer pink. Remove chicken; set aside.

Add 1 tablespoon butter to same skillet; add bell pepper, green onions and bok choy.

Cook over medium-high heat 2-3 minutes or until vegetables just begin to soften. Remove vegetables; set aside.

Melt remaining 1 tablespoon butter in skillet over medium heat until butter is sizzling.

Add chicken and vegetables to egg mixture; pour egg mixture into skillet.

Cook, stirring and lifting around bottom edges with spatula, 1-2 minutes or until eggs just begin to set.

Place skillet into oven; bake 8-10 minutes or until eggs are set.

Carefully place large plate over skillet; turn skillet to release frittata onto plate. Serve with reserved sauce.

# Home Office Essentials to Streamline Your Work Week

(StatePoint) If you've been working remotely for months, you're likely long overdue for a home office upgrade. Having the right tools can make working from home easier and less stressful.

Here are a few small tweaks and essentials to consider:

- **Scene change:** Is your home "office" actually the kitchen table or a couch? Keep a healthy boundary between your personal and professional life with a visual cue that indicates when the work day has started and when it's ended. That cue could be the strategic use of a room divider to hide personal items and keep you focused. Or, it could be as simple as plopping a desk lamp onto the kitchen table during work hours to give the surface a professional, task-oriented feel.
- **Number crunching:** Make number crunching and recordkeeping easy with a printing calculator. With Cost/Sell/Margin functionality as well as the ability to check and correct up to 150 steps and print after correction, Casio's HR-170RC is a versatile choice. Printing two lines per second with two-color printing, you can quickly produce paper records of your work for more organized files. With its small footprint, plus calendar and clock functionality, it can help you streamline your desk for a clutter-free, fashionable workspace.
- **Caffeine fix:** Now that your cup of joe is being enjoyed at home most mornings, consider upgrading your coffee maker to fit your tastes and your demanding schedule. If you miss the latte or cappuccino you used

to grab on your morning commute, it may be time to replace your standard drip machine with a full-fledged cappuccino and café latte maker. Or, consider going high-tech. New coffee maker models employing smart technology let you brew from bed using just your phone for a guaranteed caffeine fix by your early morning call.

- **Get the full picture:** If you were accustomed to a full-sized desktop monitor at work, but have working on a laptop at home, you may find you are more productive by adding an external monitor to your home office setup. With it looking more likely that remote working situations are here to stay, it's time to make your home office work for you.

# HOLIDAY SHORES Garden CLUB NEWS

By: Donna Nelson

[www.holidayshores.us/garden-club](http://www.holidayshores.us/garden-club)

As members move forward into the 2021 year, the upcoming calendar is filled with several traditional activities, plus the addition of some new and interesting programs. Members met recently to organize and make plans for the new schedule, and all are looking forward to getting back to a normal year of fulfilling the Garden Club mission. Since there was no meeting in December, the new officers for 2021 were elected and installed in November. They are:

Co-Presidents	Joyce Brendle & Donna Nelson	Co-Secretary's	Kathy Austin & Pam Barry
Vice President	Patti Brown	Treasurer	Kathy Wilhite

At the November meeting, everyone enjoyed a wonderful "Make & Take" program, led by Lesta Lamb and Mary Blackburn. Pictures on this page reflect the array of beautiful "one of a kind" arrangements that were created. It was a definite hands-on experience. The leaders demonstrated techniques, gave "how-to" instructions, and provided a wide variety of evergreens, pine cones, and other colorful embellishments to incorporate into the designs... some for fall and some for Christmas. Each person was able to take their creation home to enjoy during the holidays. Such a fun activity for all!

Lesta Lamb & Mary Blackburn

NOTE: There will be **NO** meeting in January, February, or March. The first meeting of the new year will be on Monday, April 19, 2021, at the Clubhouse beginning at 7:00 p.m. Guests are always welcome to attend any meeting.

Continued from Page 11

a little higher than what normal is. It wasn't awful. **Matt Ressler** Did you relay that back to Herman brothers? **Anthony Harrell** He talked about it with Rob while he was there. **Tony Harris** Did those get counted in our count, or do they subtract those out of what we've paid? **Rob Clarkson** They subtract them? **Matt Ressler** Did they have an idea of when in the spring? **Rob Clarkson** We haven't discussed it yet, he said first thing. There's a national bass shortage right now, nationwide. **Anthony Harrell** I wonder why that is? What causes a bass shortage?

### Solar Panels

**Anthony Harrell** We left that with Rob fry. He was going to look at some of the current submissions for solar panels and see what the footprint and height. That was one of our concerns, we really didn't have problems with the rooftop style. But the ones that are being placed in the yard on the property, we wanted some more information on it. He was gonna try and get with one of the association members who was talking about putting in the solar panels and try to get us some dimensions. Since he's not here, we'll get that information from the next meeting.

### New Business

#### Announcing New Check Signing Officers

**Tony Harris** Your officers would be Anthony Harrell-President, John Crotty-Vice President, Tony Harris-Treasurer and Matt Ressler-Secretary. **Matt Ressler** And everyone is a check signer? **Tony Harris** Yes.

### Open Floor

**Anthony Harrell** Does anyone here have anything for open floor? **Matt Ressler** I do. Where are we at with Breakfast With Santa? Are we gonna do it? **Rob Clarkson** We haven't had any volunteers. **Matt Ressler** The office ladies didn't want to. Okay. So, the other thing that I have is, on our website, it's not listed under our creel limits of our fish. Can we go in there and remove the small mouth bass because we don't have those in our lake anymore and a recommendation of changing the size limit of the stripid and hybrid stripers from 14 inches to 20 inches. So what was the first part, I didn't understand what you were talking about, taking them off? We don't have those fish in the lake anymore. **Tony Harris** We got a size limit on them? **Matt Ressler** Yeah, we have a size limit on our website. It just needs to be updated, then a recommendation to change the size limit. **Jerry Allen** What are the size of the stripers when they put them in? **Matt Ressler** I think it's four to six inches, Rob? **Rob Clarkson** I'm not sure what we ordered, I would have to look into it. **Jerry Allen** How many years does it take them to get 20 inches long? **Matt Ressler** It varies, it depends on water clarity, how much they're eaten. Normally, they'll grow about two pounds a year. But still, I mean, we're putting them in here for a reason. **Brian Wood** The whole reason we put them in there is as a predator fish to take care of some of the other fish populations so we might as well let them get bigger. **Matt Ressler** Let them get bigger before they start getting harvested later. **Rob Clarkson** I think they were 8-10s. **Matt Ressler** OK, yeah they might be, the hybrids. And we don't have a size on the stripers. **Rob Clarkson** That'll be market. **Matt Ressler** So I if you look at these lakes that are known for stripers it is 20 inches. **Jerry Allen** I was just curious how the growth of a striper would be once we put them in the lake, and how long it would take. **Matt Ressler** Five years, but I mean, if you if

you can get more out of them, then so be it. But right now, it's 14 inches. I would like to ask the board to change that to 20 inches and remove the creel limit from three to one and make them 20 inches. Because right now it's three and 14. **Jerry Allen** What if we look at the whole creel limit we have and make adjustments and then bring it back to us. **Matt Ressler** That's what I just did. **Tony Harris** Nope, I mean, it'd be nice just to have it and kind of think about it before the meeting. Maybe give us some information what some of the other lakes do. **Jerry Allen** I'm not disagreeing with you, Matt. I just want to make sure I see it. **Matt Ressler** Right. No, I get it. **Anthony Harrell** So along those thoughts the flat heads are in there for a reason to. **Matt Ressler** Flat heads are in there for a reason. I mean, if you guys want I can talk to all three of the biologists that I've been speaking with for everything else and see what their recommendations are. **Anthony Harrell** We can have channel cat but release the flatheads. **Matt Ressler** That's a possibility too. **Anthony Harrell** Our whole goal with this was trying to balance out the ecosystem and then people harvest them. **Matt Ressler** Do you want to make them catch and release only, the flat heads. **Anthony Harrell** That's what I was thinking. **Matt Ressler** I don't think so, you just up the size on them. But really, I mean, there's two ways to look at this. One way is we really don't have a way to police it. **Anthony Harrell** Right. **Matt Ressler** But it's just a suggestion more than anything else. Bottom line. But I mean, if you want to look it up in the creel limits on those, we can. I can ask all three of the biologist, what do you think on this? Maybe one flat head and three channels. I mean, I don't know. **Anthony Harrell** What do we have for this right now. What's our creel limit on catfish? **Tony Harris** We have a daily limit of three. Yeah, they're 14 inches and daily limit of three. **Anthony Harrell** Three or 14 inches. **Matt Ressler** Maybe just up that. **Anthony Harrell** Or lower it. **Matt Ressler** Up the size limit, and the lower the creel limit. **John Crotty** I like Jerry's suggestion, if you could provide a comparison to what you're wanting to change to what is now. **Matt Ressler** Right. That's what I'll do, I can do that. **Brian Wood** Part of that on the flat heads, I think is me educating the community to as you know, your money's going towards putting these in here for a reason to balance out the lake and kind of put something out to where we can educate the community on, Hey, if you're taking these out of there, it's counterproductive on what we're trying to do with the lake. **Matt Ressler** Rob, what's your take? **Rob Clarkson** I'm game to do whatever you want. You make the rules. **Tony Harris** When you guys look at it, make some recommendations back to us and that'd be awesome to have a body or voice to help get that word out too. **Anthony Harrell** Which are the ones that don't reproduce in our lake. **Matt Ressler** The stripers and the hybrid stripers do not reproduce in our lake. **Tony Harris** How long do they live? **Matt Ressler** So the hybrids, what are they're saying Rob, four to seven for the hybrids? **Rob Clarkson** Like 10 years, about 20 pounds, a little bigger than 20 pounds, and then they start dying off. The 10 years was what my understanding was on a hybrid. **Matt Ressler** But then the stripers are even longer. **Anthony Harrell** They live longer and a get lot bigger. **Matt Ressler** Neither one will reproduce. **Tony Harris** I was just trying to get an idea of you know, if we're talking about raising the limit, and if it takes them like, like five years to get to that size, and their only going to live seven you got about a two year or if they have 10 you got a two to five year window then? **Matt Ressler** Well, they're pretty active in our lake, they're really active. You know, whenever we had a whole bunch of them in here. Yeah,

we don't have them because we weren't stocking them for so many years. But they're fun to catch. But if you hook an actual striper hold on, because you probably won't get it in. **Tony Harris** That's when it's fun to fish. **Matt Ressler** I'll talk to the biologist and we'll go from there. **John Crotty** Any other open floor from the board? **Anthony Harrell** Anybody in the audience have anything open floor? **Kent Scheibel (893)** I have some questions about political signs. I drove up here on election day, and I noticed that both entrances to the parking lot were shrouded in signs, political signs, and I went and I complained as to our office people and they tried to get a hold of some people but they couldn't. Rob was sick and everybody else was gone or out. And, you know, they just didn't know. So I came back Monday this week, to see if you had a meeting on Veterans Day. And at that same time, I noticed the signs were still there. And I thought they probably shouldn't be. And so I did talk with Rob and his only thing was he seemed to be concerned about was the size of the signs more than anything. And he made sure I picked up my little rules so that I could, you know, speak accurately. I did look up on page 48, when it talks about political signs, which gives the dimensions. And I said, well, is there any restrictions against placing signs on association property? And he kind of like, well, no, not really. I said, good, then I can take them and place some down on the beach, oh no, you couldn't do it there, you know. So obviously, there is some kind of restriction. And it bothers me that we have political signs on association property for several reasons. I think it's an unfair advantage for the people that don't know about it. It also represents an endorsement for those people who have their signs on the property. Somebody's looking at the signs at all, well, the association wants me to vote for this person. Look, they let them put their signs here. And not only that, it gives the people running for whatever office an opportunity to get that last glance in if you don't know who you're going to vote for. It might be the thing to change your mind or turn it around. With that, I'm looking to you, are there any restrictions, as far as I've always thought, and I've only been out here about 47 years, that political signs were okay on private property. And hopefully, we won't have to share the public property of the association to set them up where people enter and exit Holiday Shores, along the beaches, along the club house, on the roads that are split as you come in one way or another. Hopefully, that won't be the case. But I was always under the assumption that the signs had to be placed on private property and the association property was taboo. I know about seven mayors personally, and none of those mayors have in their community a place to put signs that the city owns. And that's Granite City, Edwardsville, Godfrey, Wood River, South Roxana, Alhambra and Hamel and none of those places do so I'm surprised that we allowed it. Do we allow it? Or is it just a misunderstanding? **Anthony Harrell** I wasn't aware that we had any on our property. **Tony Harris** I've seen them at almost every election since I've been here for 10 years, when you come in the poll, they have to be a certain distance away. They have to be out there when you come into the parking lot. They can't be out by the door. **Anthony Harrell** Did they approach us for permission to put up signs? **Matt Ressler** We should have taken them down. **John Crotty** I saw them, but I agree. I don't think the rule says you can't put it on association property. **Tony Harris** Yeah, I'm not seeing it. I was looking at it and it just has the size in here. But I mean, they've been out here. They've been at every entrance every year, so I've seen them every year I've come in. **Brian Wood** Sounds like it's just something it's never been addressed. But I agree with this

gentleman they probably shouldn't be on association property. **Anthony Harrell** I agree that we shouldn't be advocating for one. **Jerry Allen** So should we write something up to add to our rules here so that we're clear? **Anthony Harrell** I think so. **Rob Clarkson** It's not people from out here putting them up, it's people that are showing up the morning of. **Jerry Allen** Yeah, political parties are for electioneering. **Kent Scheibel (893)** Well, that's even worse that we have outsiders coming to Holiday Shores on our private areas and putting up signs on the polls? I think 40 feet for electioneering purposes, but I was on the county board and I used to go to all my precincts which were Moro 3 here. Matter of fact, I'm the guy that moved it to here from the water company when they put in their solar panels and ate their parking lot up. So that was 10 years ago, approximately. Fort Russell 5, Edwardsville 3, Edwardsville 21 you know, in other words. And I would check every election. Matter of fact, I take doughnuts around for the election judges because I felt along with their hundred dollars or so for doing a job like that, doughnuts would good. I would always keep my eye out for this, and I never had this happen. I vote sometimes early now. And I don't always come here. And in doing such, I've never seen the signs before. And I was in awe when I saw them. **Anthony Harrell** Oh, I don't recall if there were any at the fire department or not. **Kent Scheibel (893)** There shouldn't be. Across the streets one thing. You know, that's private property. But at the fire department itself, it shouldn't be, it never had been. **Matt Ressler** Okay, so we're just gonna draft something up. **Anthony Harrell** Yeah, we'll just add to the verbiage we have for political signs. I can do that. I'll draft something up. Sounds great. **Tony Harris** The question is, if it's not our people putting them up, other people aren't going to read the rules anyway. **Matt Ressler** That will clear us for the next time. **Tony Harris** We just direct security to go out there and take them down. Like I said, I don't know If we need the rule for that, or just direct them to go out there and take them down. **Matt Ressler** Might not hurt just to put a rule in there. Change some verbiage. **Anthony Harrell** Thanks for bringing that to our attention. **Kent Scheibel (893)** I appreciate you taking time to listen to me. Thank you very much. **Anthony Harrell** Anybody else? **Shelley Acevedo (906) (Guest)** Some probably know the situation with the drainage. I have some pictures for the record, you guys can take a look at or whatever. And I'm also gonna leave a Topo map survey. It is sealed, nevertheless. **Shelley Acevedo (906)** I spoke with Decker, and he referred me to Rob, and I spoke to Rob and he said for us to come up here. **Shelley Acevedo (906) (Guest)** Nevertheless, our concern is the water is just crazy. We do not have a backyard. As you can tell from the pictures, there's some in there for wintertime. Like this time of year as it's getting colder, if you get a big rain, it freezes. It's an ice rink for you know, until it thaws out and then it's a mud mess for however long after that. The enlarged piping, you know did make a little bit of a difference. We're getting more erosion now throughout the property. I'm not gonna say it, you know made a whole world of difference, but it did. I don't know if the association did or if the neighbor himself put some riprap on the other side. **Shelley Acevedo (906)** The neighbor did that. **Shelley Acevedo (906) (Guest)** Which obviously is going to slow it down a little bit but it don't change the fact that if we'd want to put a fence up, it's going to catch every leaf that comes off the upper part of town. Everything funnels right down through the yard, you know, we can do a garden, can't do a pool, can't really even really get out there for days after a decent rain or steady

# REMINDER

2021 Dues & Assessments are due  
January 1, 2021

They can be paid in increments of:

\$236.00 January 1

\$237.00 March 1

\$237.00 May 1

Late charges are assessed on the 10th of each month

## DECALS

2021 decals are pink. If you cannot wait to be the first on the lake with your 2021 decals, bring in a copy of your registration and proof of \$300,000 liability insurance (for motorized boats) as soon as your Dues & Assessments are paid in full. There will be four types of decals: motorized, non-motorized (kayaks, paddle-boards, canoes etc, PWC's and slow moving vehicles (golf carts, side-by-sides etc.)

# The Other Side

The door of 2020 closes. The door to 2021 opens. All of us are hoping that 2021 will prove to be a lot better year than 2020. It may or may not be. In all likelihood, January will be a lot like December and the new year will rush forward with the same problems and issues as the previous year and maybe with some new ones. That the 2020 door closes and 2021 door opens does not mean meaningful change.

Someday, though, one door will close and another will open and the change will be dramatic for all of us. The door to 'time' and 'this world' and 'this life' will close. The door to eternity will open. This occurs at the moment of our death. Theologian Robert H. Smith was awed by that moment. He wrote,

The clock of life is wound but once,  
And no man has the power  
To tell just when the hands will stop  
At late or early hour.

To lose one's wealth is sad indeed,  
To lose one's health is more,  
To lose one's soul is such a loss  
That no man can restore.

What is on the other side of the 'eternity' door depends on the decisions we have made about Jesus in this life. If we put our trust in Jesus as our Savior from sin, the door to eternity opens into a wonderful world of perfection where Jesus lives. If we reject him, the door opens into a world of terror and distress. John (5:11-12) puts it this way: "God has given us eternal life, and this life is in his Son. He who has the Son has life; he who does not have the Son of God does not have life." I invite you... to admit that you are a sinner and that you are in trouble with God. ...that Jesus is the only One who can help you. ...to call out to Jesus and tell him the above.

For further conversation about the Bible or spiritual matters, please contact Pastor Rob Lemon at Holiday Shores Baptist Church at 618.377.7729 or [pastorrob@holidayshoresbaptist.org](mailto:pastorrob@holidayshoresbaptist.org).

Continued from Page 23

rain because it trickles across there for days after rain. **Shelley Acevedo (906)** You can't mow for at least a week and a half after it rains. It's like a river. And that comes through there at that volume legitly and the erosion that's coming that has created on the properties like ridiculous. **Matt Ressler** Rob, what's your recommendation? **Rob Clarkson** We've had the engineer out to look at it, and try to come up with a reasonable plan to divert the water. We have an outlot there too but it's uphill. It's kind of hard to make it go uphill. But I mean, engineers looking at it. Rob and I met with him and he looked at it pretty hard and he's supposed to get with me. **Anthony Harrell** you're on the upstream side or the downstream? **Shelley Acevedo (906) (Guest)** Downstream. So I know you can't make water go up hill. And I know you can't make water make a 90-degree turn. It'll do what it wants to do. We're willing to work with whoever to sacrifice, you know, part of it. **Rob Clarkson** We're looking at trying to use an earthen berm where that pipe comes out, direct it out away, but you still have what's coming down the hill off your driveway. If you look at your cypress trees, all the knobs are eroded away, and that's coming off the driveway, that has nothing to do with the pipe. And that was an issue when we we're looking at it with the engineer to. **Shelley Acevedo (906) (Guest)** All the water that comes down the hill on the road and comes down along the driveway along with all the gravel. If you look in those pictures, you'll see the gravel that like stacked up constantly. We're constantly cleaning up the gravel that's coming off the roadway. You know, the road is a canal, there's a ditch but the chat is built up and it can't get to the ditch, so it comes down until it hits our driveway. **Shelley Acevedo (906)** There is a grate in the front yard within the 15-foot easement, but it doesn't seem to go anywhere. **Shelley Acevedo (906) (Guest)** There is a metal grate like going for under the driveway. **Rob Clarkson** From the previous homeowner? **Shelley Acevedo (906) (Guest)** I wouldn't think it would be. I would think it's within your guys' area. I wouldn't think the previous homeowner really would have put it in. **Shelley Acevedo (906)** It's like a manhole in the middle of the yard. **Rob Clarkson** What the association does is it puts the culvert pipes underneath the road, not underneath your driveways. The homeowners do anything in your driveway and that ditch. If it's in that ditch area that's probably the guy before you that put that in. **Shelley Acevedo (906) (Guest)** So all that work that's been done up the hill, you guys aren't putting none of those culverts in their driveways. **Rob Clarkson** If they need a new culvert they get it replaced? Originally it was put in by the homeowner. **Jerry Allen** So you said there's a ditch in your front yard?

**Shelley Acevedo (906) (Guest)** There's a grate. **Jerry Allen** No, is there a ditch going down the easement way in your front yard? **Shelley Acevedo (906) (Guest)** It runs underneath the driveway towards the other side? I don't know. I've kind of looked around on the other side. I can't see anywhere there is an exit. Where this big boulder comes out, is it just going under a flat yard or is there a ditch there? It's pretty flat. **Brian Wood** I think I know where it's at. It's basically down in a valley where it comes down the hill both ways. **Shelley Acevedo (906) (Guest)** The Association has that property, 50 foot between our backyard, and the house next door that goes all the way to the lake. So where that water is flowing on the downstream side of the culvert is our property. **Shelley Acevedo (906) (Guest)** No, it's on our property. **Rob Clarkson** Not until it gets almost all the way to the lake. Conversation ensues. **Shelley Acevedo (906) (Guest)** I would just like a backyard, you know, for eventually a pool or you know, anything. **Matt Ressler** So what do you want us to do? **Shelley Acevedo (906) (Guest)** See what can be done. **Matt Ressler** Which we're already doing that now. **Anthony Harrell** This is on his property, though. **Matt Ressler** But Rob's already working with an engineer. Correct? **Rob Clarkson** We had the engineer look at it. I mean, it's all about money. **Anthony Harrell** So my question is, Rob, what authority do we have since it's not on our property, it's not on an easement, like a road like what we just did for all the ditching, what authority do we have to go in there and do any kind of ditching or whatever would need to be done? **Rob Clarkson** We don't. Only in that first 15 feet. **Anthony Harrell** The first 15 feet after the culvert discharge. **Rob Clarkson** First 15 feet from the road edge or 25' from the center of the road. **Anthony Harrell** There's not a whole lot we can do. **Shelley Acevedo (906) (Guest)** But there's 50 foot of association property running that same direction to the lake. That if that was cut down, even if, if I got to take down a tree, there's one oak there. Even if I gotta take that one oak tree down to get it to the back of the property. **Anthony Harrell** So you're saying re-divert some of the water to somewhere else? **Shelley Acevedo (906) (Guest)** To association property, the 50' easement. **Matt Ressler** You can't flow water up. **Jerry Allen** Conversations ensues. **Matt Ressler** Hey Rob, can you follow up with the engineer and see what his recommendation is? **Rob Clarkson** We haven't paid the engineer do any of this. Conversations ensue. **Anthony Harrell** So we'll talk about this. We'll get with Rob, the engineers. It's gonna take us some time. So we're going to keep your document here from the plat. And we'll do some investigation on it, see what our options are. We'll get the engineer Hayden. Maybe he'd come up with some options, but it looks

like there might be some ways around it. It's just gonna come down to money. Anything else for open floor? **Matt Ressler** Hey, Rob, what's the update on the culvert on Holiday Point Parkway? Is it completed? **Rob Clarkson** Yeah, it was in my manager report. I can update you on the silt removal. We removed about 3800 cubic yards of silt out of Spanish Cove. **Anthony Harrell** So that just shows us we've got a big silt problem. It started out at three foot where they started digging in, and they had a six-foot-deep pocket. **Rob Clarkson** Now a lot of that is going to slug back down. It's 3800 cubic yard gone. So it tells you where we're at with silt in this lake. **Brian Wood** How long did that take to remove? **Rob Clarkson** Two days. **Tony Harris** Are they done or are they taking more out? **Rob Clarkson** Their done. **Jerry Allen** I noticed there's been loads of dirt on people's property, I guess is coming from there. **Rob Clarkson** We didn't dump any dirt for anybody. We hauled it to the north end to the farmers property. If they wanted stuff they had to come get it themselves.

**Rob Clarkson** Somebody else could be digging to. There's a lot of people digging. **Jerry Allen** Okay, I thought that was the same soil. **Anthony Harrell** So if nothing else, it shows us we need to move forward, we got to try and come up with a plan for some funding for that barge with the mini ex. **Matt Ressler** Well, let me ask you this. So you know, we're talking about a mini ex. You know, you put it on a barge, we're gonna lose, what's the extension on that mini ex? **Rob Clarkson** The ones that we looked at had a working range of eight foot and that's from the barge. So you would be able to dig out eight feet. **Matt Ressler** So you're not gonna lose two foot with it being on the barge. **Anthony Harrell** I don't think we need more than six feet. **Rob Clarkson** You can only put so much on a barge anyway. **Anthony Harrell** Okay, just food for thought, start thinking about some creative ways to..... **Matt Ressler** Have we done anything with any grants? I mean, we're losing out on a lot of money sitting out there. **Anthony Harrell** We need to move forward with that too.

**Tony Harris** Makes a motion to adjourn

**Matt Ressler** Seconds

**Meeting adjourned at 8:29 p.m.**

# HOLIDAY SHORES FIRE DEPARTMENT

## Firefighter's Footnote

*We at Holiday Shores Fire Department hope you had a Merry Christmas and a Happy New Year!*

We hope you were able to celebrate as safely as possible with a downsized group of family and friends this year. We had a scaled back December also. Out of an abundance of caution, we canceled our Christmas dinner and party this year. However, we were able to have Santa Claus visit some of our department members' children by way of one of our fire trucks. Somehow Santa always finds a way! We ended our year by finishing our on-line training classes and holding a Fire Trivia Night along with a Fire Service Vehicle Operating Course. In the next couple months, we will practice our Ice/Cold Water Rescue Drill. We had 17 calls over the last month that we responded to: 11 EMS runs, two brush/grass fires, and one run each for a building fire, lift assist, smoke detector activation, and Emergency Medical Service Incident. We continue to work and practice as safely as possible by using hand washing or sanitizers, distancing and masks, and when responding to calls for possible Covid-19 by using personal protection equipment. Our hope for the New Year is that everyone has a healthy, happy and safe 2021.

As the temperature drops down/below near freezing these next few nights and parts of the morning, remember to use space heaters in a safe manner! Also remember to have your furnace inspected, vents clear of dust and debris, and change your filters for better maintenance.

It's also a good idea to place a Carbon Monoxide (CO) detector close to your sleeping area (at least 5 foot off the ground) so that the alarm will sound to wake you. If you suspect any CO issues in your home, please feel free to contact us.

**ESFI Heat Your Home Safely**

32% of home heating fires are caused by space heaters.

**MORE HOME FIRES OCCUR** during the cold winter months than at any other time of year.

**Make Sure to Follow These Important Tips Before You Plug In**

- PLACE space heaters on a flat, level surface, away from high-traffic areas.
- PLUG a space heater directly into an outlet and avoid using an extension cord.
- NEVER LEAVE space heaters unattended.
- ONLY USE space heaters with the condition label of a nationally recognized testing lab.
- DON'T USE a space heater if the plug is broken or the cord is frayed, worn or damaged.

**Four Home Heating Tips to Live By**

- 1 KEEP ANYTHING THAT CAN BURN** at least three feet away from a heating source. **3ft**
- 2 HAVE YOUR HEATING SYSTEM** inspected annually.
- 3 KEEP VENTS CLEAR** of dust and debris.
- 4 INSTALL CARBON MONOXIDE (CO)** alarms to avoid the risk of CO poisoning.

[www.esfi.org](http://www.esfi.org) [facebook.com/ESFI.org](https://facebook.com/ESFI.org) [twitter.com/ESFIdotorg](https://twitter.com/ESFIdotorg)

Make sure you wear layers to keep warm in the cold and windy conditions.

**NO WIND** **WINDY**

**The Science of Wind Chill**

**98.6°F**  
Average temperature of the human body

When people lose heat through convection—there's still a layer of heat between our skin and our cold surroundings.

**95°F**  
Hypothermia begins when our body temperature drops two to four degrees.

But when it's windy, the moving air breaks up this insulating layer. It speeds up heat loss by whisking away the warmth from our skin.

Heat is moved away from our bodies.

for a link to leave comments.*

### PROPOSED AMENDMENT OF BYLAWS

#### ARTICLE IV - DUES, ASSESSMENTS, LIENS, FEES, AND INTEREST

##### Section 3 - Annual Assessments

- A. No change
- B. No change
- C. New addition as follows:

An assessment will be levied beginning budget year 2022 for a four (4) year period to fund road way engineering and design, structure, repair, resurfacing, storm water management (Ditch repair, maintenance, ditching, culverts and materials) and improvements. Funds collected from the membership under this assessment shall be used exclusively for roadway improvements as noted above. The assessment shall be calculated for each member based on the linear foot of roadway fronting all properties owned by the member. Road frontage by linear foot will be determined by Plat Book ##### dated ##### as recorded by Madison County, IL. The initial assessment owed by all members for the year 2022 shall be calculated at \$1.00 per linear foot. For the next three years or any subsequent years thereafter, the amount charged each member for all roadway improvements will be discussed and approved at each annual meeting during the proposed budget discussions for upcoming year. The Board will be responsible for proposing annual charge per foot based off roadway improvements budgeted for upcoming year.

The foregoing figures shall replace and reduce any part of the members assessment which has been used in the past and documented in the budget for 2021 for road way, engineering, design, structure, repair, resurfacing, storm water management, maintenance and improvements.

# Ways seniors can stay safe and active during COVID-19

(BPT) - By now, most seniors are aware that they're among the most vulnerable demographic groups when it comes to contracting COVID-19.

"This pandemic has brought great challenges and stress for seniors. But the good news is, there are ways to exercise safely and maintain an active lifestyle," says Tivity Health president and CEO Richard Ashworth. "Exercise is vital for maintaining optimal health, and through easy-to-access digital and in-person options, it is our hope seniors can continue or renew exercise regimens quickly and safely."

Maintaining regular exercise during COVID-19 need not be difficult. If you're a senior wanting to maintain effective workouts each day, here are some tips you can follow even if you're practicing social isolation.

Start slowly. If you haven't been exercising, you'll want to ease into your new routine gradually. Studies indicate just two weeks of inactivity (or a 75% reduction in daily steps) can decrease your muscle strength by 8%, while dropping 1,000 to 1,500 steps each day can both raise both inflammation and blood pressure. You should jump-start your new regimen with safe exercises like squats, wall push-ups, light weightlifting regimens and taking walks (keeping distance from others for safety).

In fact, 56% of seniors responding to a Tivity Health poll said their future workout plans call for participating in online classes two to three times per week. You may find SilverSneakers' LIVE classes are your perfect option; the instructor-led online exercise sessions are being offered to all SilverSneakers members. Avoid prolonged sitting. Even if you must set a timer to remind yourself, take frequent breaks from sitting and engage in rejuvenating strolls - or simply take part in activities that involve standing. The point is to avoid being sedentary for long intervals of time.

Whether you're staying at home or practicing safe social distancing while out and about, there's no need to give up the exercise that can help you maintain optimal health during the pandemic. Take steps now to ensure you're taking good care of yourself through age-appropriate workouts and movement.

Free exercise classes are held  
in the ballroom every  
Monday, Wednesday & Friday mornings.

YOGA - MONDAY 8:30am-9:30am  
WEDNESDAY & FRIDAY 8:00am-9:00am

BEND & STRETCH/FLOOR EXERCISES MONDAY  
9:30am-10:30am

WALK AEROBICS  
WEDNESDAY & FRIDAY 9:00am-10:00am

January 2001

## HOLIDAY SHORES PEOPLE PAGE

### Thank You...

The Board of Directors wishes to extend a big thank you to **Barb & Jerry Theodor** for their many years of coordinating and volunteering their time and help with the Breakfast with Santa. Along with Barb & Jerry, the Board would like to thank the following volunteers for their help with the Breakfast with Santa:

Lauri Byrns, Kai Cavalie, Julie & Ray Garber, Joyce & Jim Brendle, Ralph Keune, Darrell & Sherran Price, Dotti & Stu Wagner, Jeanne Votruba, Charlie Fox, Kris Woycke, Kristin Polwort, Jeri Lynn Goes, Jessica Theodor and Cindy Lucier.▲

### Birthdays...

JANUARY 6: Happy Birthday to Pat Winans.

JANUARY 15: Happy Birthday to John Beusang, Jr.  
*from Bunny▲*

### Boating Safety Classes...

We are in the planning stages for the Boating Safety Classes. For those interested in taking classes, there will be details in the next issue.▲

### NOTICE

Three bicycles have been turned in at the Public Safety Office. If you are missing a bicycle and think we might have it, call the Public Safety Office at 656-7294 or the Holishor Association Office at 656-7233.

### FREE SEMINAR

**Avoiding Probate / Estate Planning**

**March 22 at 7:30 p.m. • Clubhouse**

*Refreshments available. Any questions, call the Holishor Office at 656-7233.*

### Pictures from the Murder Mystery Dinner

Kris Cunningham had one of the main parts of the Murder Mystery.

Committee members preparing the delicious meal.

Joyce Brendle received a Tee Shirt from The Bissell House.

### Deadline Coming Up For Holiday Shores Girl's Softball Team

Interested girls between the ages of 14 - 18, please reply by mail or e-mail to the Holiday Shores Office:

#1 Holiday Point Parkway or [holishor@acfi.net](mailto:holishor@acfi.net).

If signing up by mail, please fill out the form below and return or include the information in your e-mail.

Name: \_\_\_\_\_ Age: \_\_\_\_\_

Address: \_\_\_\_\_

**Assistant coach is needed.** Anyone interested, please call the office at 656-7233.
